

Welcome to the 2016 AGM

Friends of Black Hill and Morialta Inc.

2015 ended in a BANG!

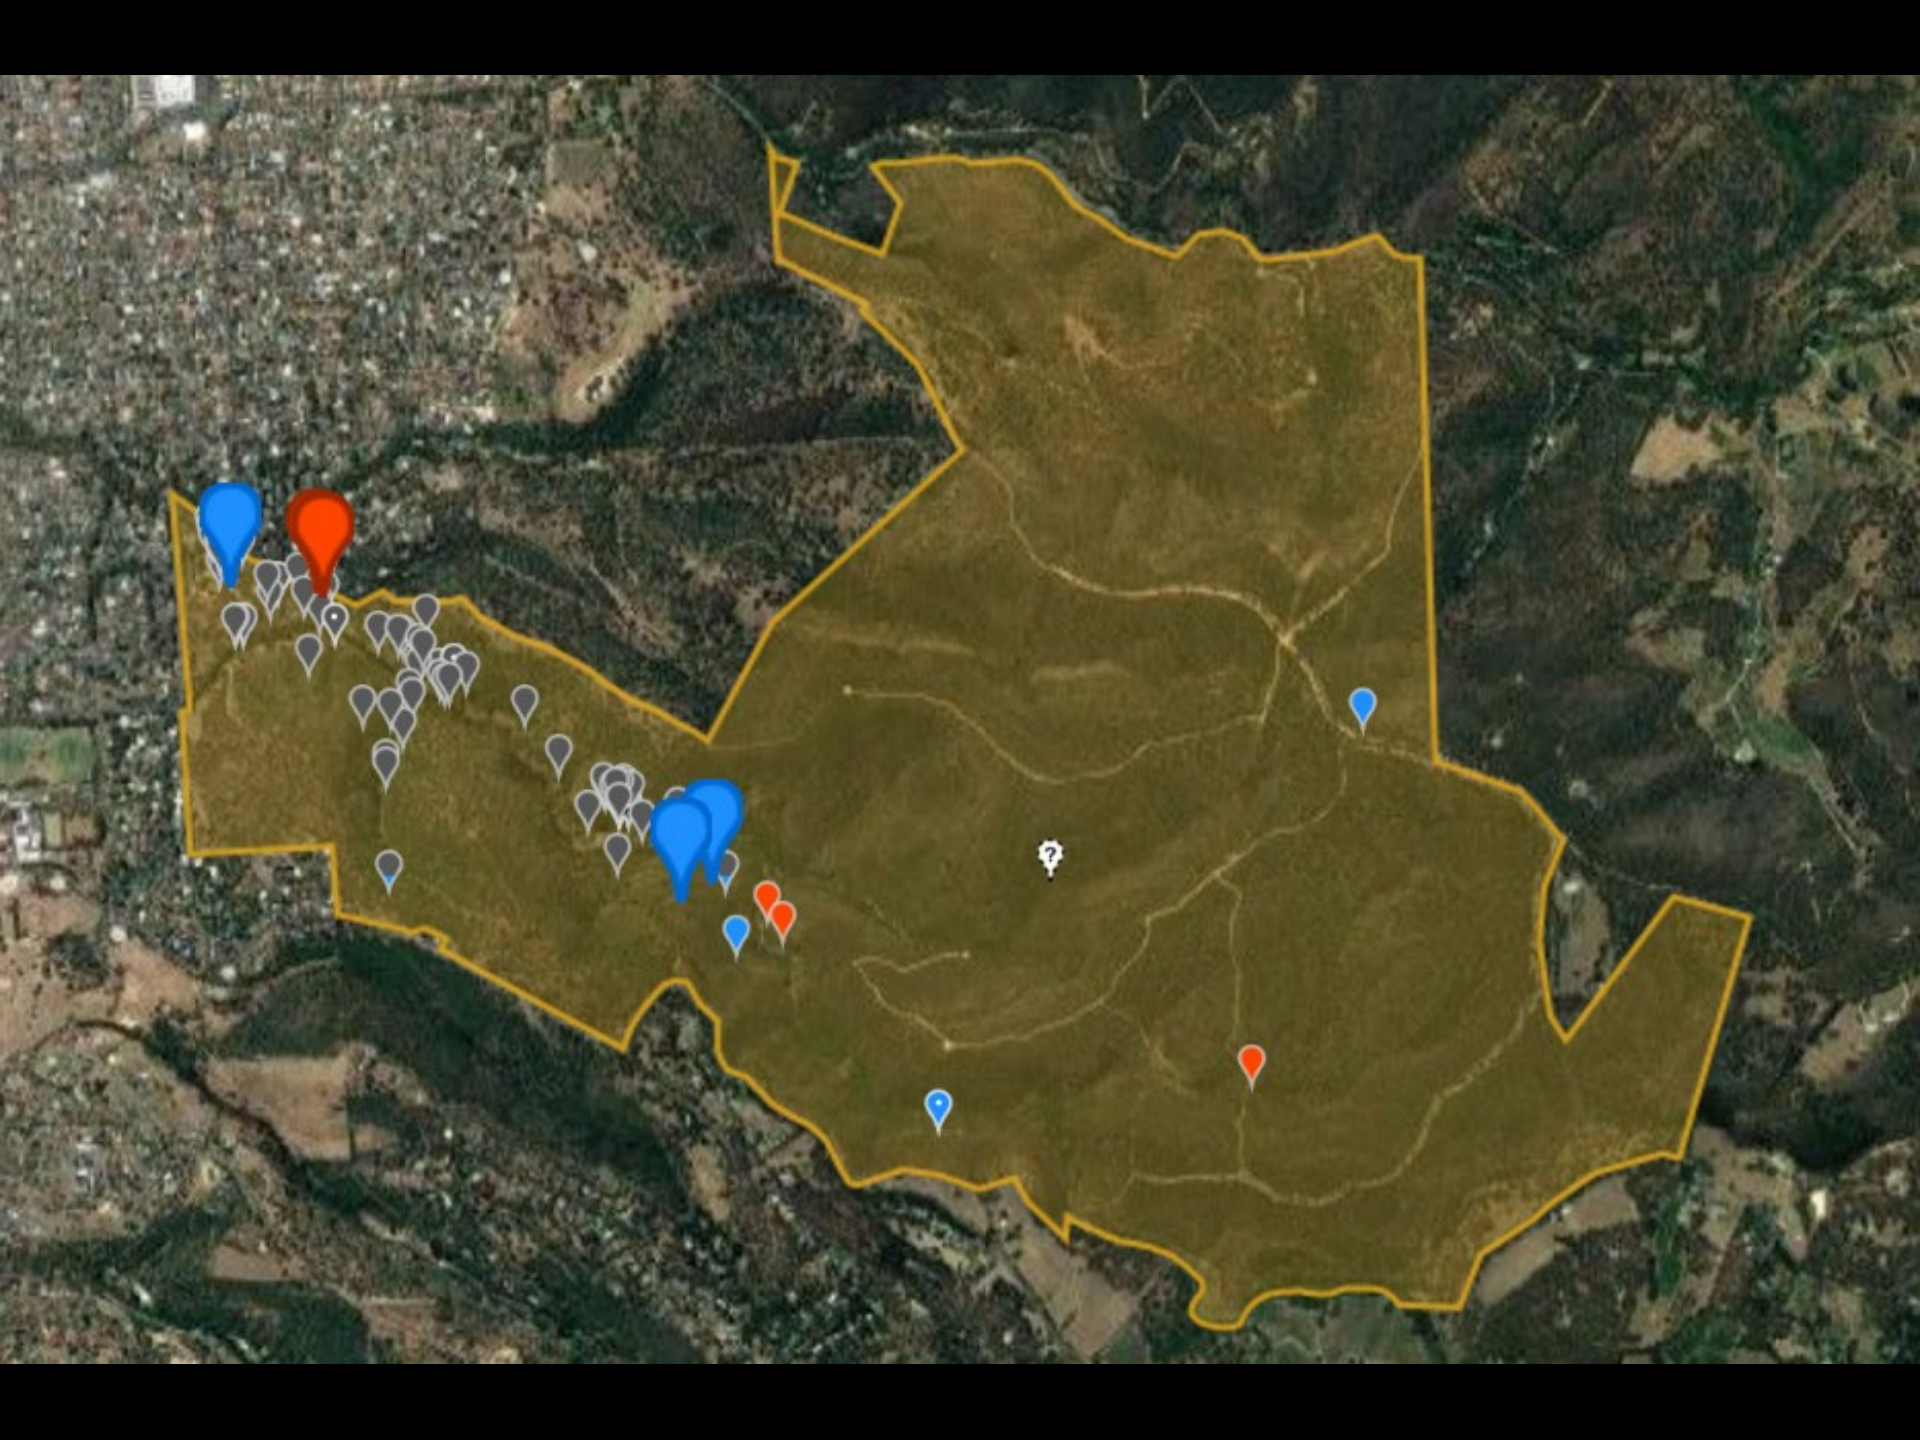

THANKS VOLLIES

Looking forward (actual and wish list):

- New Green Army projects
- Developing the grassland in Morialta
- Expanding Community Engagement
- Expanding and consolidating networking with other groups
- Indigenous History of the parks
- European history of the parks
- Built history of the parks
- Frog recoding and identification
- More work with the wildlife camera
- Recoding and identifying bat calls.
- Further development of Social Media
 - Facebook
 - Youtube
 - Instagram
- Ongoing work on the website
- New ideas

Penny McCreadie

Welcome to the 2016 AGM

Friends of Black Hill and Morialta Inc.

2015 ended in a BANG!

We ended 2015 in a BANG!

At the Friends of Parks Forum, we attracted a number of awards for the events we put on throughout 2015 which was the Morialta Centenary Year.

Community Engagement – for the work done in connecting up with the SA Rock Climbing Club and UNI SA Rockclimbers to create the Crag Care project. Regular events in Morialta where the rock climbers could learn about biodiversity in the park and contribute to caring for the habitat around the rock climbing sites.

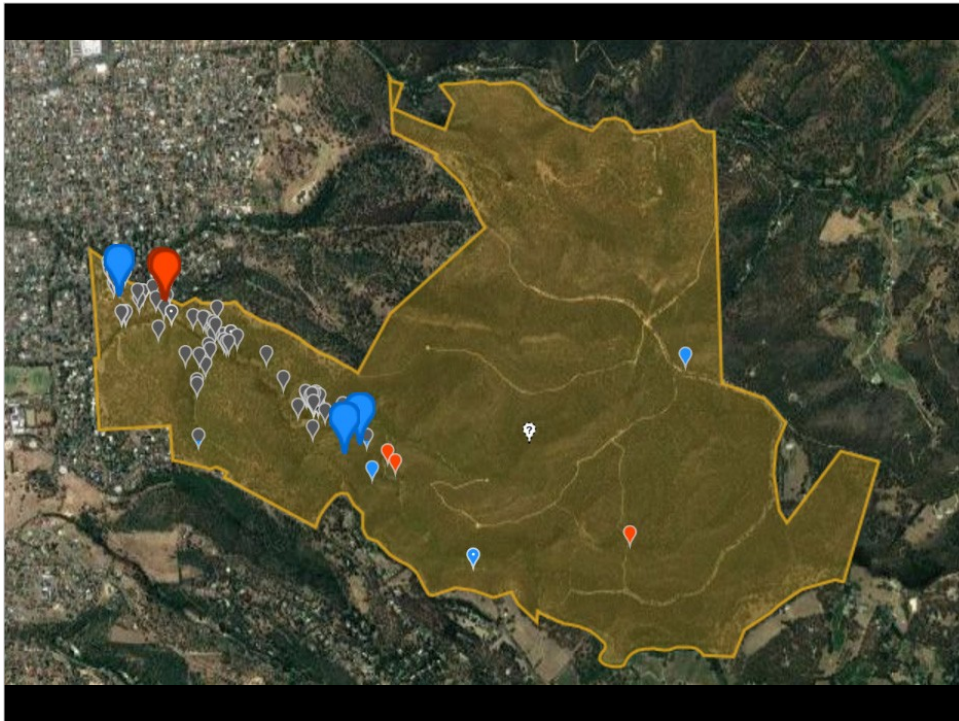

The Morialta BioBlitz is a collaboration between: UniSA (the Discovery Circle); the South Australian Museum; the Department of Environment, Water and Natural Resources; Natural Resources Adelaide & Mt Lofty Ranges; and the Friends of Black Hill and Morialta.

The event is supported by SGIC and the Campbelltown City Council. There were 605 observations made at the Morialta BioBlitz, made of 184 different species

DEWNR Recognising and celebrating 30 years in the Parks! At the annual volunteer thank you event.

Jacob and the Green Army Team have been amazing. The focus of the work is around protecting and restoring habitat for the Chestnut Rumped heathwren and the Southern brown bandicoot. They have done this by addressing weedy species threatening the habitat of these threatened species, working to allow better migration paths by connecting areas of quality bushland. They have been successful everywhere they have worked through Horsnell Gully, Black Hill and Morialta and will all their projects. I have had nothing but positive feedback for their work particularly the sensitivity they have approached tasks with, causing the minimal amount of off

Looking forward (actual and wish list):

- New Green Army projects
- Developing the grassland in Morialta
- Expanding Community Engagement
- Expanding and consolidating networking with other groups
- Indigenous History of the parks
- European history of the parks
- Built history of the parks
- Frog recoding and identification
- More work with the wildlife camera
- Recoding and identifying bat calls.
- Further development of Social Media
 - Facebook
 - Youtube
 - Instagram
- Ongoing work on the website
- New ideas

There are many ways to get involved, so I encourage you to get out in the Parks, and be part of the activities the Friends are doing.
